Construction Construction is the
process of constructing a building
or infrastructure. Construction
differs from manufacturing in that
manufacturing typically involves

mass production of similar items without a designated purchaser, while construction typically takes place on location for a known client. Building Construction & Design - Civil Engineering ... Civil engineering is a professional engineering discipline that deals with the design, construction, and maintenance of the physical and naturally built environment, including public works such as roads, bridges, canals, dams, airports, sewerage systems, pipelines, structural components of buildings, and railways. Civil engineering is traditionally broken into a number of sub-disciplines. It is considered the second-oldest engineering discipline after military engineering, and it is defined to
