Moderation, and ... Moderation and mediation are two very different ideas, so it is a little unfortunate that they not only have such similar names, but also tend to accompany the same citation: Baron and Kenny (1986). While there are a few similarities between the two analyses that are important to understand, here we will focus on the differences between ... What is the difference between moderation and mediation ... 1 What are Mediation and Moderation? Mediation analysis tests a hypothetical causal chain where one variable X affects a second variable M and, in turn, that variable affects a third variable Y. Mediators describe the how or why of a (typically well-established) relationship between two other

variables and are sometimes called intermediary variables since they often describe the process through which an effect occurs. Chapter 14: Mediation and Moderation With one mediator and two moderator, the story of moderated mediation is the following, "There is no overall moderation effect of Mod1 and Mod2 on the link between X and Y. However, the indirect effect, via Med1, is higher, and the residual direct effect is lower, when Mod1 and Mod have particular combination of values than the other combinations." Mediated Moderation vs. Moderated Mediation (Concepts ... Moderator variables always function as independent variables, whereas mediating events are viewed either as effects or as causes, depending
