Let  $y = f(x)$  be a function of  $x$ . If at  $x = a$ ,  $f(x)$  takes indeterminate form, then we consider the values of the function which is very near to  $a$ . If these value tend to a definite unique number as  $x$  tends to  $a$ , then the unique number so obtained is called the limit of  $f(x)$  at  $x = a$  and we write it as . Limits and Derivatives
