CHNOPS Simulating Protein Synthesis In this investigation, you will simulate the mechanism of protein synthesis and thereby determine the traits inherited by fictitious organisms called CHNOPS. CHNOPS, whose cells contain only one chromosome made up of six genes (A, B, C,D, E, and F), are members of the Kingdom Animalia. Each gene is responsible for a certain trait. CHNOPS! - Simulating Protein Synthesis In this investigation, you will simulate the mechanism of protein synthesis and thereby determine the traits inherited by fictitious organisms called CHNOPS. CHNOPS, whose cells contain only one chromosome, are members of the kingdom Animalia. Genes are the units that determine inherited characteristics, such as hair color and blood type. Genes are lengths of DNA molecules that

determine the structure of polypeptides (the building blocks of proteins) that our cells make. The sequence of nucleotides in DNA determines the sequence of amino acids in polypeptides, and thus the structure of proteins. CHNOPS, whose cells contain only one chromosome made up of six genes (A, B, C,D, E, and F), are members of the Kingdom Animalia. Each gene is responsible for a certain trait. Simulating Protein Synthesis In this investigation, you will simulate protein synthesis by transcribing the DNA and translating the mRNA of the imaginary CHNOPS monster. The CHNOPS monster's cells contain only one chromosome that carries nine genes: A, B, C, D, E, F, G, H, & I each of which code for a specific trait. Simulating Protein Synthesis - Kercher Biology In this investigation, you will simulate the mechanism of protein synthesis and thereby determine the traits inherited by fictitious organisms called CHNOPS. Transcription and Translation Video Fishel ABC: CHNOPS Lab level 1/2 In this activity, you will simulate protein synthesis by transcribing the DNA and translating the mRNA of the imaginary CHNOPS monster. You will decode each gene to determine the phenotypic expression of the HNOPS monster's NA, and then draw the monster based on your results. Monster Synthesis Activity In this investigation, you will simulate the mechanism of protein synthesis and thereby determine the traits inherited by fictitious organisms called CHNOPS. While C and N are constituents of all amino acids, these elements are not equally distributed due to variations in the length and composition of the side-chains.
