Dialysis In Children And  
Adolescents Dialysis in Children and  
Adolescents: The Pediatric  
Nephrology Perspective. The care of  
children with end-stage renal  
disease (ESRD) is highly specialized  
and often poorly understood by  
nonpediatric providers and  
facility/institution  
administrators. Dialysis in Children  
and Adolescents: The Pediatric  
... Dialysis in Children and  
Adolescents: The Pediatric  
Nephrology Perspective Index

<12 years. Chronic dialysis in children and adolescents, Pediatric ... Kidney transplant is considered the best treatment option for kidney failure in both adults and children. Having a kidney transplant means your child does not need dialysis. If possible, it is better for a child to have a transplant instead of starting dialysis. Dialysis is a time-consuming process that puts stress on the entire body. Kidney Disease in Children (Pediatric Kidney Disease ... The ratio of children on haemodialysis compared to peritoneal dialysis is approximately 1:2; of the 173 children who received dialysis in the UK in 2003, 38% were on haemodialysis (Report of the Paediatric Renal Registry, Seventh Annual Report of the UK Renal Registry, December

2004). Haemodialysis clinical practice guidelines for children ... Chronic dialysis in children and adolescents.
