Endoscopy - Wiley Online Library Endoscopy is a
nonsurgical procedure used to examine a person's
digestive tract. Gastroenterologists use an endoscope,
which is a thin tube attached to a light and camera, to
view the inside of the digestive tract. There are two
types, an upper endoscopy and a lower endoscopy,

also called a colonoscopy. These two procedures scope out different parts of the digestive system and can help your doctor to check the health of these parts of your body. What does an endoscopy do? | Centers for Gastroenterology We performed a Pubmed, Medline and Embase search between March 23, 2020, and April 3, 2020, using 'SARS-CoV-2', 'COVID-19', 'GI endoscopy', 'endoscopy, digestive system endoscopy' as MeSH terms. We used only published data, reports and articles written in the English language. COVID-19 and gastrointestinal endoscopy: What should be ... Since digestive endoscopy procedures are at high risk of contagion (due to close and continuous contact with the patient who produces droplets and / or

aerosols of secretions), the following PPE must be placed on a trolley, in order of use: 1. disposable water-repellent boot covers; 2. a first pair of disposable gloves; 3. Safety in digestive endoscopy procedures in the covid era ... Endoscopy may also be used to treat a digestive tract problem.
