Bischoff, Peter Austin, Kurt Boeykens, Michael Chourdakis, Cristina Cuerda, Cora Jonkers-Schuitema, Marek Lichota, Ibolya Nyulasi, Stéphane M. Schneider, Zeno Stanga, Loris Pironi. Clinical Nutrition 39 (2020) 5-22 Download file: ESPEN guideline on clinical nutrition in liver disease ESPEN Guidelines ESPEN Guidelines on Enteral Nutrition 213 The results of the Cochrane Library review by Heyland⁵however, differed in its conclusions. Heyland concluded that early EN should be recommended in the critically ill (B) whereas it should only be

considered in other ICU patients (C). ESPEN Guidelines on Enteral Nutrition: Intensive care Early full feeding also increases the risk of refeeding (see Recommendation 57). On the other hand, a too low intake, below 50%, may lead to severe caloric debt and empty the energy reserves, reduce lean body mass and may increase infectious complications [116,117]. Recently the analysis of a large data base including 1171 patients with indirect calorimetry data [129] confirmed that under- and overfeeding were both deleterious, and that the optimal amount appeared to be between 70 and 100% of measured EE. These new and more rigorous methodologies for ESPEN guidelines both have a focus on disease rather than the historical technique-based approach (enteral vs parenteral). The multidisciplinary, multinational approach remains, but the guidelines are more structured and ESPEN guideline: Clinical nutrition in inflammatory bowel ... ASPEN Enteral Nutrition Handbook Second Edition contains the latest recommendations on safe practices, ENFit ®, and new information on preparation, labeling, and dispensing of EN. It is a step-by-step, practical guide to

caring for patients receiving EN therapy. 2019. The ASPEN Enteral Nutrition Task Force has compiled these external resources to help both clinicians and consumers make educated choices on enteral nutrition. ASPEN | Enteral Nutrition Resources Supplementary enteral nutrition (EN) is indicated when ASH patients cannot meet their caloric requirements through normal food (A) and when there are no contraindications like ileus (C). Comment: These recommendations are based on six trials studying EN in 465 ASH patients, 1-6 of which only three trials were randomised 4-6 (1b). ESPEN Guidelines on Enteral Nutrition: Liver disease ESPEN Guidelines on Enteral Nutrition 333 maintains or improves nutritional parameters

irrespective of the underlying diagnosis. The metabolic consequences of ageing which can lead to sarcopenia and a severely reduced nutritional status at the time of tube placement can impair or even prevent successful nutritional therapy (III). ESPEN Guidelines on Enteral Nutrition: Geriatrics Enteral Nutrition Last Updated: 24 March 2018 Patients who either are unable to take any nutrition orally or who are unable to take sufficient nutrition orally, but in whom the gastrointestinal tract is functioning, may be fed enterally. This implies feeding into the gastrointestinal tract using a tube. Enteral Nutrition - BAPEN In mild acute pancreatitis enteral nutrition (EN) has no positive impact on the course of disease and

is only recommended in patients who cannot consume normal food after 5-7 days. In severe necrotising pancreatitis EN is indicated and should be supplemented by parenteral nutrition if needed.
