that extends through-out the life span. Studies have shown that the health of a child can be affected either positively or negatively by the health practices of the mother during the prenatal period. Therefore, health pro-motion starts before birth and extends through childhood, adult-hood, and old age. Health Promotion Throughout the Life Span - BrainKart Extensive coverage of growth and development throughout the lifespan emphasizes the unique problems and health promotion needs of each age and stage of development. Separate chapters on each population - group, individual, family, and community - stress the unique issues faced when providing care to each group. [PDF] Health Promotion Throughout The Life
