In particular, I like Liboff's discussion on good/bad quantum numbers and the matrix representation of quantum mechanics. The corresponding discussion in Griffiths is really lacking.

My main complaint regarding Liboff is that some sections seem to be out of context, in particular the last few sections in chapter 7, 8 and 11.

Most free books on Google Play are new titles that the author has self-published via the platform, and some classics are conspicuous by their absence; there's no free edition of Shakespeare's complete works, for example.
