## Microeconomics li Problem Set lii Microeconomics III Problem Set 1

This problem set covers rationalizable and strictly dominated strategies, best replies, and pure-strategy Nash equilibria (i.e., equilibria where mixed strategies are not used). The first three questions are in strategic form, with finite strategies. The remaining questions, with continuous strategies, are more ... Microeconomics III Problem Set 1 - Mike 14.123 Microeconomics III—Problem Set 1 Muhamet Yildiz Instructions. You are encouraged to work in groups, but everybody must write their own solution to the problem that is for grade. Good Luck! (i) (For Grade) There are n

Problem Set 5 1. In class, we considered a numerical example of a simple two-e ort, two-outcome principal agent model. Here, we reconsider this example for general values. A risk-neutral agent can either put in low or high e ort. The probability of project success is given by  $p_l$  if the e ort level is low, Microeconomics III Problem Set 5 - Mike Microeconomics III Problem Set 2 This problem set focuses on mixed strategy equilibria in normal-form games. 1. Two students are responsible for a joint assignment. A good grade requires costly e ort on the part of both students. Each student can elect to invest e ort (work) or not invest e ort (shirk). The game in strategic form is: S W
