Network Recovery: Protection and Restoration of Optical ... The down side to restoration as a protection technique is that the recovery time is

not fast enough. The second approach is to have a predefined backup path computed before the failure. This approach is said to be failure independent and it takes less processing time to recover as compared to the failure dependent approach. Path protection - Wikipedia Editor's note: This article was expanded and updated in November 2017. When building a data center disaster recovery plan and a business continuity plan, remember that you are protecting a significant investment in information technology and communications. Depending on the nature of the disruption, the data center's overall integrity may be untouched or it could be totally destroyed. Data center disaster recovery plan template and guide Recovery.
