INFORMATION The human urinary system consists of two kidneys, two ureters, one urinary bladder, and one urethra. This system has two basic functions, both of which occur in the kidneys. The Kidney Dissection **YOUR GUIDE TO DISSECTION** Since 1817 Dissecting a Kidney By examining and dissecting a kidney, students can gain a greater understanding of the structure of the organ, the texture of the components and the way it connects and works within the body. The Kidneys produce urine from waste products and excess water. **YOUR GUIDE TO DISSECTION - Philip Harris** They purify the blood by first filtering it and then reabsorbing those molecules that are important for a healthy body. Dissecting a kidney

reveals the many subtle features of the body's filtering system. Looking at a fresh sheep's kidney we can identify three features. The ureter, renal vein and renal artery. Biology-kidney dissection 1. Lay a few pages of newspaper on the bench and put the dissecting board on them. 2. Place the kidney on its side on the dissection board and carefully remove the fat from around the kidney. 3. Arrange the kidney so that the renal sheath, which contains the ureter, is located to the bottom right (see Figure 2). It's easy to search Wikibooks by topic, and there are separate sections for recipes and childrens' textbooks. You can download any page as a PDF using a link provided in the left-hand menu, but unfortunately there's no support for other formats. There's also Collection Creator - a handy tool that lets you collate several pages, organize them, and export them together (again, in PDF format). It's a nice feature that enables you to customize your reading material, but

it's a bit of a hassle, and is really designed for readers who want printouts. The easiest way to read Wikibooks is simply to open them in your web browser.

.

A little people may be laughing following looking at you reading **sheep kidney dissection guide** in your spare time. Some may be admired of you.
