Sustainable Seattle | For a more sustainable future There is an inherent design flaw when trying to categorize tiny houses as eco-friendly and sustainable, and that is that they are usually on wheels. We think the best way to reduce the carbon footprint of a tiny house is to put it on a slab on grade or at least helical piers instead of wheels, and keep your home at home! It's disappointing that there's no convenient menu that

lets you just browse freebies. Instead, you have to search for your preferred genre, plus the word 'free' (free science fiction, or free history, for example). It works well enough once you know about it, but it's not immediately obvious.
