On dry land, most organisms are confined to the surface, or at most to altitudes of a hundred meters—the height of the tallest trees. In the oceans, though, living space has both vertical and horizontal dimensions: with an average depth of 3800 meters, the oceans offer 99% of the space on Earth where life can develop. The Deep: The Extraordinary Creatures of the Abyss by ... “The book is composed of giant (frequently larger-than-life-size) photographs of deep-sea creatures: the gelatinous *Pandea rubra*, which bears an uncanny resemblance to a police strobe light; the seed-like larvae of the Spantagoid heart urchin, whose appendages stretch at near-perfect right angles; glass octopi like living x-rays, frilled sharks, furry lobsters. In all, nearly 200 creatures, some of which have never been photographed before, many of which are unknown species, all of
