involving particulate solids. Unit Operations of Chemical Engineering by Warren L. McCabe In chemical engineering and related fields, a unit operation is a basic step in a process. Unit operations involve a physical change or chemical transformation such as separation, crystallization, evaporation, filtration, polymerization, isomerization, and other reactions. For example, in milk processing, homogenization, pasteurization, and packaging are each unit operations which are connected to create the overall process. A process may require many unit operations to obtain the desired product. Unit operation - Wikipedia In this course we study the core of Chemical Engineering: Unit Operations. What are Unit
